

How can we protect ourselves from the pandemic flu?

Knowledge is our strongest defence.

We should wash our hands with soap for at least 20 seconds very frequently.

We should not touch our eyes, nose and mouth with our hands.

When coughing and sneezing we should always use a paper handkerchief and throw it in the nearest bin.

We should avoid close contact with people who show signs of disease.

If we notice that we have the pandemic flu symptoms, we have to stay at home and call our doctor.
